Offshoring and Outsourcing

February 27, 2009
NuCure Bioscience

• A “stealth-mode” biopharmaceutical company that bridges the clinical and commercial development between the U.S. and Asia to meet unsolved medical needs

• Value Propositions
  – Clinically, to accelerate the development of targeted compounds
    • Easier/faster enrollment of patients for late-stage clinical trials
    • Faster access to late-stage clinical trial results
    • More cost-effective early-stage research on any potential indication
  – Commercially, to speed up market entry into China and other APAC countries
  – Financially, to generate quicker revenues ramp to support early-stage biotech research companies in the U.S.
A Leading Biotech Company’s Operation in China

• Objective
  – Support the commercial businesses, strategic partnerships, and overall in-country development by establishing a focal point for the Company’s operations in China

• China Operation Focus
  – Develop manufacturing to support two key products
  – Establish clinical and commercial supply of the Company’s products
  – Establish R&D capabilities for in-house development and partnering
  – Enter Chinese market of existing products and services
  – Create a sustainable, flexible facility to support growth
