

"On the Horizon: Will Technology and Public Policy Collide?"

Please join us for this interesting and timely public policy panel discussion.

The discussion, which will include interaction with the audience, will touch on critical policy issues affecting wireless applications and deployment, as well as the networks of today and the future. Topics may include spectrum management, the use and future of VoIP, the roles of the federal and state governments, and how such issues affect consumers.

Because the panelists are among the country's most recognized experts on public policy and technology, their dialogue will provide a sense of how public policy is set.

This panel discussion, which is part of a larger wireless and mobile computing conference being held at Dartmouth, will take place on Friday, October 10, 2003, from 9:00 a.m. to 10:15 a.m. in Collis Common Ground.

RSVPs are necessary. Please blitz Mike Bober to let us know if you would like to attend.

Moderator: Adam Golodner, Associate Director for Policy, ISTS, Dartmouth College

Panelists:

- **Jim Snider, Senior Research Fellow, New America Foundation**
- **Matt Dunne, Vermont State Senator**
- **Robert Pepper, Chief, Policy Development, Federal Communications Commission**
- **Peter Pitsch, Director, Communications Policy, Intel Corporation**
- **Howard Woolley, VP, Federal Relations & State Public Policy, Verizon Wireless**
